

SZP.c25 Whitepaper

A Virtual Asset with the Reward Advantages of Stable Growth Technology aiming to Surpass Bitcoin

<https://sonzpo.github.io/szp.c25>

1. Abstract

SZP.c25 is a subtoken derived from the sonzpo charity token SZP for monetization of stable growth technology and surpassing bitcoin. In association with profitable technology transferring to token holders for expected monthly transactions about three million USDTs, there are 20% SZP.c25 tokens collected by monthly payments from holders to be burned and 80% tokens to be repriced 125% for token generation event TGE and distribution to achieve monthly 25% appreciation in token price. If it is possible to realize aforementioned operations, it will be a good chance for SZP.c25 to surpass bitcoin in the near future.

2. Problem Statement

A major fundamental shortcoming for Crypto is the absence of fundamentals and intrinsic value. One of the biggest drawbacks would be its inability to generate any form of cashflow which makes it impossible to derive an intrinsic value. By transferring the stable growth technology which equity will be positive predictive value for long-term operations, SZP.c25 is focused to achieve the monthly transaction / cash flow about three million USDTs for further information services of transferred technology to remedy the liquidity drawback of cryptocurrencies.

3. The SZP.c25 Solution

SZP.c25 introduces the reward advantages of stable growth technology aiming to surpass Bitcoin.

How It Works:

- Users are able to use USDTs to exchange SZP.c25 tokens at a 1:1 ratio during fair launch.
- When holders of SZP.c25 exceed 30,000 in fair launch, individuals or institutions holding at least 100 SZP.c25 tokens during this period will receive a significant reward: a transfer of profitable technology for a specific industry. This technology has been scientifically proven and is capable to produce daily returns exceeding 20% with long-term positive predictive value in equity growth.
- Individuals or organizations that receive this technology transfer can freely operate and profit on their own or pay SZP.c25s equivalent to 100 USDTs per month to subscribe further information services for receiving highly accurate and profitable daily recommendations of market entry.
- The ecosystem adopts an open architecture. In addition to its own mature technologies, it will openly solicit and accommodate more and better profitable technologies from around the world, and further effectively and continuously transfer them to token holders to improve the sustainability of the ecosystem.
- SZP.c25 is focused to achieve the monthly transaction / cash flow about three million USDTs for further information services of transferred technology to remedy the liquidity drawback of cryptocurrencies.
- There are 20% SZP.c25 tokens collected by monthly payments from holders to be burned and

80% tokens to be repriced 125% for token generation event TGE and distribution to achieve monthly 25% appreciation in token price. If it is possible to realize aforementioned operations, it will be a good chance for SZP.c25 to surpass bitcoin in the near future.

- Finally, but most importantly, SZP.c25 adheres to the principles of fairness, justice, and openness. Without affecting the development of the ecosystem, it will actively accept the management and auditing of supervisory units or third-party organizations to demonstrate its credibility.

4. Token Mechanics

Feature Summary Table:

Token Name: Sonzpo Charity Token for 2025

Symbol: SZP.c25

Standard: ERC-20

Backing Asset: USDT

Ownership: Via USDT exchange (1 SZP.c25 = 1 USDT)
in fair launch

5. Roadmap

****Q4 2025****: Seed run and fair launch for startup

****Q1 2026****: Monetization of crossover technology

6. Tokenomics

Tokenomics details (e.g., supply cap, allocation, incentives) are under development and will be finalized in the audited version of the whitepaper.

7. Conclusion

SZP.c25 represents a new virtual asset with the reward advantages of stable growth technology aiming to surpass Bitcoin. SZP.c25 also represents an innovative circular economy inspired by Dr. Jing, Yuan-wu's philanthropic philosophy of "let poverty disappear from the world".

Furthermore, the token manager anticipates receiving SZP.c25s worth a total of 30 million USDT each month. 20% of the virtual warrants will be destroyed. The remaining 80% will be priced at 125% of the token. Token Generation Events (TGEs) and distributions will be announced on major investment platforms. This will allow SZP.c25 holders around the world to benefit from a 25% monthly appreciation. Given some time and combined efforts, SZP.c25 is able to have a good chance to surpass Bitcoin.
